OBJECTIVE

Motivated Web Developer and aspiring Data Scientist with experience in responsive web application development, alongside growing expertise in Data Science and AI, including machine learning and deep learning. Strong problem-solving skills with experience in company projects and freelance.

EXPERIENCE

Data Science and AI Intern — Besant Technologies, Velachery Feb 2026 - Jul 2026

- Undergoing hands-on training in Data Science and Artificial Intelligence, covering Python, statistics, machine learning, and deep learning.
- Working on applied AI projects including model building, data preprocessing, and evaluation using real-world datasets.
- Gaining practical exposure to tools and libraries such as NumPy, Pandas, and deep learning frameworks for model development.

Web Developer Intern — Infotact Solution, Bangalore Oct 2025 - Dec 2025

- Developed responsive UI interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Improved layouts and optimized performance.
- Tested and debugged UI components for device compatibility.

Junior Java Developer Intern — Paragon Dynamics Info System, Chennai Apr 2025 - Aug 2025

- Built full-stack Java applications and improved backend modules.
- Supported UI enhancements and participated in debugging and documentation.

Freelance Web Developer — Self-employed Ongoing

- Designed and developed custom invitation websites for clients, including marriage invitations, birthday invitations, and surprise reveal pages.
- Built responsive, animated pages with RSVP forms, photo galleries, countdown timers, and music/video integration tailored to each event.
- Managed end-to-end delivery — client requirements, design, development, and hosting — for multiple independent projects.

EDUCATION

Besant Technology — Data Science and AI (Internship & Training) Feb 2026 - Jul 2026

University Of Madras Distance Education — Bachelor Of Computer Application (BCA) 2023 -2026

Central Polytechnic College — Diploma In Civil Engineering (DCE) 70% | 2020

Saraswathi Vidyalaya Matric Hr. Sec. School — SSLC 79% | 2015

SKILLS

Programming & Web: HTML5, CSS, Java, Python 3.14.3, SQL, React JS 19.2.4,Power Bi

Data Science & AI: Machine Learning, Deep Learning, Neural Networks, NumPy, Pandas, Data Preprocessing, Model Evaluation

PROJECTS

Sign Language Recognition — Deep Learning

- Built a deep learning model to recognize hand gestures and translate sign language into text in real time.
- Used convolutional neural networks (CNN) for image classification and gesture recognition on a custom/curated dataset.
- Applied data preprocessing, augmentation, and model evaluation techniques to improve recognition accuracy.

Hyperlocal Service Application — Infotact Solution

- Location-based service booking app with provider onboarding, secure auth, and booking management.

E-Commerce Website — Infotect Solution

- Full-stack e-commerce platform with product listings, JWT login, cart system, and REST APIs.

Custom Invitation Websites — Freelance

- Marriage, birthday, and surprise reveal websites with RSVP forms, photo/video galleries, and countdown timers.
- Delivered mobile-friendly, shareable designs personalized to each client's theme and event details.

Live Shipping Projects — Paragon Dynamics

- Worked on logistics dashboards (GIVIEN, MBK) including UI updates and module enhancements.

Course Analysis — Power BI

- Built an interactive Power BI dashboard analyzing course enrollment, completion, and performance data.
- Cleaned and modeled data using Power Query and DAX to identify trends in student engagement and course ratings.
- Designed visual reports with charts and slicers to help stakeholders track course performance at a glance.
